LET'S KEEP OUR MOB SAFE

Top up your immunity this Winter

You can top up your COVID-19 protection with a COVID booster if you're 18+ and it's been six months since your last dose or infection.

The COVID-19 vaccine does not protect against the flu, so you should still have your free annual flu shot.

Receiving your COVID-19 and influenza vaccines is safe and produces a good immune response.

Talk to your health care worker for more information or visit <https://www.healthdirect.gov.au/australian-health-services> to find and book an appointment.
